

Water Quality Monitoring Solutions:

Uisce Technology are a leader in Process Instrumentation Solutions to Irish Industry and have a proven track record in helping industry identify and implement appropriate water quality management measures. Our early involvement in assessment & monitoring of water quality has helped our customers meet the statutory requirements and avoid unnecessary production problems.

- Discharge Assessment & Compliance
- River, Lake & Reservoir Water Quality
- Coastal and Estuarine Water Quality

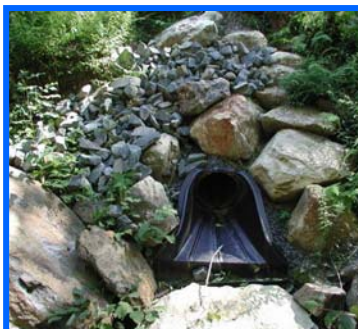

Contamination of freshwater is a major environmental problem in Ireland and Rivers, Lakes & Groundwater come under the EU Water Framework Directive (WFD), Directive 2000/60/EC. The objective of the WFD is to prevent deterioration of surface waters, groundwater and water dependent ecosystems. New developments in national and local policy insure it is the statutory responsibility of all sectors of industry to implement secure, traceable water quality management systems.

Our Products:

- Flow
- pH & Temperature
- Dissolved Oxygen
- Turbidity
- Ammonia
- Chlorine
- Phosphate
- Nitrates
- Data-logging, Automation & Remote Communication
